

“I can drive long distances”

For about four and a half years I have suffered from constant pain in my lower back, neck and left shoulder, along with ringing in my ears. I hadn't done any treatment for the pain, and I was not on any medications. On a scale of one to ten, my pain was an eight.

My wife led me to chiropractic treatment, and I doubted it. I believed that I would have the pain for the rest of my life. I was very impressed with this office and their professionalism. I came in with an attitude, but it was diffused by Dr. John's calmness and willingness to listen.

I have had very good results. I am pain free and have better movement in just a little over three months. I can actually drive long distances without pain. My wife came to Dr. John for sciatic nerve pain which has been gone for a while now. She continues to come for wellness. She is pain free, and has better movement. I recommend that anyone who is in pain, sick, or suffering try chiropractic. I feel good about chiropractic, and I would like to see more insurance companies realize the benefits, and cover it on policies!

Sincerely,

James Carson
Patient
