I was having crippling pain in my low back + left hip. I was 9 days post-surgery on my abdomen when pain began. It was severe enough that I had to use a quad cane to ~~assist~~ walk. Within 4 visits for adjustments, I no longer needed the cane. After approximately 12 visits (4 weeks), I was much better + pain was almost completely gone. All of the pain relief was due to chiropractic treatment only, as I could not take any pain medication.

I hereby give my permission for all or any part of the above statements to be reproduced with or without my name and/or photograph, and to be used in the interest of telling others about the benefits of chiropractic care.
