

“I can sleep through the night and spend more time with my family”

For about 9 years I have suffered with headaches, leg pain, sleeplessness, and upper and lower back pain. These problems were accompanied by other issues including irritability, difficulty walking, and fatigue.

The medications I was using would only give me temporary relief, so I decided that I would try chiropractic care. After my first couple of visits I began to experience some relief. The staff and Dr. John are wonderful.

I am now able to sleep through the night! I am also able to walk through the mall, zoo, and grocery store without hurting. I am able to spend more time with my family as a result of the treatment. I have also been able to quite my medications. I would definitely recommend chiropractic care to anyone who is sick, suffering or in pain. I love the care I am receiving and the benefits of feeling better!

Sincerely
